

COLLIN

Dual Direction Linear Luminaire

COLLIN Dual Directional Linear Luminaire

Our direct/indirect linear luminaire, COLLIN, combines contemporary design aesthetics with modern lighting functionality. COLLIN blends into the surrounding architecture beautifully, while delivering strong, even illumination to walls and ceilings via a variety of light distribution options.

Concealed within COLLIN's slender rectangular aperture is a true workhorse fixture constructed of heavy gauge extruded aluminum. 3 sizes are available, 3.25", 2.25" and 1.25" apertures. Direct and indirect lighting capabilities can be achieved using LED light engine options or T5, T5HO and T8 fluorescent lamps. Optional 2-Circuit (2CKT) switching capabilities light the ceiling or work plane simultaneously, or individually, providing alternative distribution when and where you need it most - or don't.

Features and Benefits:

- Available as 1.25", 2.25" and 3.25" aperture sizes
- Heavy gauge extruded aluminum housing
- Wall Mount (WM) or Cable Suspended (CSS) mounting options
- LED, T5, T5HO or T8 linear fluorescent light sources
- Precision machined smooth aluminum end caps conceal all finishing hardware
- Standard integral power supply (225/325), Remote (125)
- Optional dimming or emergency battery pack features available
- User defined LED lumen/wattage output (CLO)
- Custom colors and finishes available
- UL and c-UL listed for dry and damp locations
