

COLLIN

Direct/Indirect Linear Luminaire

BIRCHWOOD
lighting

Our direct/indirect linear luminaire, COLLIN, combines contemporary design aesthetics with modern lighting functionality. COLLIN blends into the surrounding architecture beautifully, while delivering strong, even illumination to walls and ceilings via a variety of light distribution options.

Concealed within COLLIN's slender rectangular aperture is a true workhorse fixture constructed of heavy gauge extruded aluminum. Direct or indirect lighting capabilities can be achieved using T5, T5HO and T8 fluorescent lamps, T5HE or T5HO seamless fluorescent lamps, or LED light engine options. Optional 2-Circuit (2CKT) switching capabilities light the ceiling or work plane simultaneously, or individually, providing alternative distribution when and where you need it most - or don't.

COLLIN

COLLIN 325 CSS

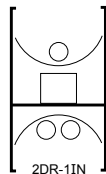

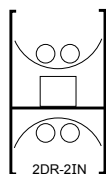

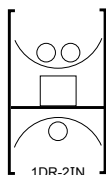

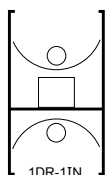

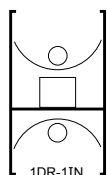

Features and Benefits:

- Available as 2.25" and 3.25" aperture sizes
- Heavy gauge extruded aluminum housing
- Surface (SM) or Cable Suspended (CSS) mounting options
- LED, T5, T5HO, T8 linear or seamless fluorescent light sources
- Precision machined smooth aluminum end caps conceal all finishing hardware
- Standard integral ballast
- Optional dimming or emergency battery pack features available
- Standard integral ballast and drivers
- Custom colors and finishes available
- UL and c-UL listed for dry and damp locations
