

JILL

Recessed Drop-Lens Luminaire

JILL Recessed Drop Lens Luminaire

Elusive and revealing: JILL combines the best of both qualities within striking, slender apertures that almost dissolve into the ceiling, yet still unveil a subtle glow from their unique dropped lens features. Direct light to the floor or work plane with multiple drop lens options for various lighting effects.

1.65", 2.25", and 3.25" models can be ceiling or wall mounted. Framing options available as: Trim (TR) featuring a visible $\frac{3}{4}$ " flange, "Trim-less" (TL) featuring mud-over flange or T-Grid frame selections for dropped ceilings. Fixture housings are comprised of heavy-duty extruded aluminum, lenses are extruded acrylic.

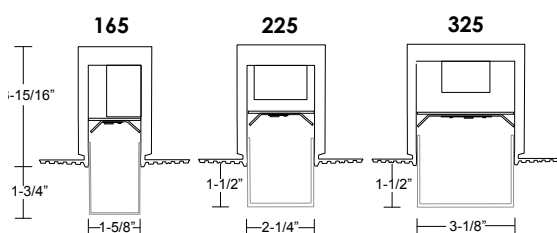

With smaller apertures, versatile mounting capabilities and the appearance of almost floating standard or reveal lenses, JILL offers beauty in plain sight.

Features and Benefits:

- LED, T5, T5HO or T8 linear fluorescent light sources
- Trim (TR) or Trim-less (TL) flange, or T-Grid ceiling mounting styles available
- Light sources are accessible through lens opening for easy replacement
- Optional mitered angles allow creation of angles and shapes for a wall or ceiling.
- 1.50" rectangular, 1.50" tear drop, or .38" reveal lens options
- Illuminated acrylic or machined aluminum end cap options available
- Integral electronic power supply is standard. Dimming and emergency battery pack compatible
- Can be installed as continuous run
- U.L. and c-U.L. listed for dry and damp locations
