

# JILL

Linear Drop-Lens  
Recessed Luminaire

BIRCHWOOD  
lighting

Elusive and revealing: JILL and JILL-ASYM combine the best of both qualities within striking, slender apertures that almost dissolve into the ceiling, yet still unveil a subtle glow from their unique dropped-lens features. Direct light to the floor or work plane with JILL, or select JILL-ASYM for elegant wall washing effects.

1.65" or 3.25" models can be ceiling or wall mounted. Framing options available as: Trim (TR) featuring a visible 3/4" flange, "Trim-less" (TL) featuring mud-over flange or T-Grid frame selections for dropped ceilings. Fixture housings are comprised of heavy-duty extruded aluminum, lenses are extruded acrylic.

With smaller apertures, versatile mounting capabilities and the appearance of almost floating direct or asymmetric lenses, JILL and JILL ASYM offer beauty in plain sight.

JILL 165 and 325 TL

## Features and Benefits:

- LED, T5, T5HO or T8 linear fluorescent light sources
- Trim (TR) or Trim-less (TL) flange, or T-Grid ceiling mounting styles available
- Light sources are accessible through lens opening for easy replacement
- Optional mitered angles allow creation of transverse runs from wall to ceiling
- Illuminated acrylic or machined aluminum end cap options available
- Integral electronic ballast/driver is standard. Dimming and emergency battery pack compatible
- Can be installed as continuous-run
- U.L. and c-U.L. listed for dry and damp locations
