

KELSEY and HAILEY

Square and Round Architectural Linear Luminaires

BIRCHWOOD
lighting

Sophistication, versatility and efficiency are the hallmarks of KELSEY and HAILEY square and round linear luminaires.

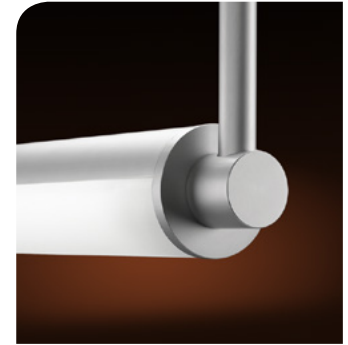

Minimal 1.25", 2.25" and 3.25" streamlined fixture profiles are manufactured of extruded aluminum, insuring straight and true stand-alone or continuous-run installations. Rotational Arm System (RAS) allows fixtures to rotate up to 361° and feature lockable aiming for precise light delivery to the vertical, horizontal or ceiling plane. Cable Suspended System (CSS) for ceiling mount, and Stack light (STK) mounting for shelving applications are also available.

All connecting hardware is precision-engineered to remain invisible within the smooth extruded-aluminum housing. Frosted Clear or Frosted White extruded acrylic lenses provide gorgeous illumination while still preserving the ultra-modern design aesthetic Birchwood Lighting is known for.

KELSEY and HAILEY

KELSEY 225 RAS
Rotational Arm System

HAILEY 225 RAS
Rotational Arm System

Features and Benefits:

- Single or double T5, T5HO, T8 fluorescent or LED light sources available in up to 8' nominal lengths
