

STELLA

Imaginative Design Possibilities

BIRCHWOOD
lighting

Fascinating in form, eclectic in design, STELLA represents the best of both while providing beautiful illumination and overall efficiency within a world of imaginative lighting possibilities.

STELLA

STELLA's design capabilities are easily imagined by simply selecting the Fixture Shape and Fixture Accent options. Fixture Shape is either Curved Edge (CE) or Angled Edge (AE) and Accented with either Reveal (R) or Slotted (S) cut-outs. Accents are designed to deliver light through either a tri-side lens (Slotted) or flush lens (Reveal). To further enhance the texture, dimensions and layers of this ever-versatile luminaire add color to STELLA's Fixture Shape and underlying housing.

STELLA is a cable suspended and surface mount luminaire available in 4' and 8' stand-alone lengths with integral electronic ballast. Available with LED or T5, T5HO or T8 fluorescent lamp sources.

STELLA CSS AE S

Features and Benefits:

- Decorative Angled Edge (AE) or Curved Edge (CE) feature attractive cut-away accents in Reveal (R) or Slotted (S) styles
- Reveal (R) accent exposes fixture housing as contrasting surface and dimension with flush lens providing direct light
- Slotted (S) accents allow light to 'beam' through slots via underlying tri-side lens
- Heavy gauge extruded aluminum housing
- Cable Suspended (CSS) or Surface Mount (SM) options
- LED, or T5, T5HO or T8 fluorescent lamping
- 4' and 8' Stand alone standard lengths
- Standard integral ballast or driver
- Optional dimming or emergency battery pack features available
- Standard Satin Clear anodized aluminum finish for fixture housing, Powder Coat finishing on decorative outer shape
- Custom colors and finishes available
- UL and c-UL listed for LED in dry locations. UL and c-UL listed for Fluorescent in damp locations.
