Elegant Wet-Location Luminaire

BIRCHWOOD  
lighting

VANESSA combines high-end architectural styling with precision engineering to create a strong, elegant wet-location luminaire designed to complement wet exterior or interior installations.

Weather-sealing prevents water and moisture from entering the lens, power entry points and end-caps. Constructed of heavy gauge extruded aluminum,  $\frac{3}{8}$ " precision machined smooth end-caps and extruded acrylic lenses, VANESSA is built to last while withstanding elements associated with wet label applications.

VANESSA is available with LED or single or double T5, single T5HO or T8 linear fluorescent lamps. 2', 3', 4', 6' and 8' nominal lengths are standard. Custom lengths and continuous runs are available.
