lighting

## ARRA CERTIFICATION For Federally Funded Projects

Birchwood Lighting, Inc. certifies that our products satisfy the requirements of Section 1605 (Buy American) of the American Recovery and Reinvestment Act (ARRA). All of our products are proudly designed and built at our factory in Tustin, California. When available in satisfactory quality, we use components that are made in the U.S.A.

Due to price constraints and availability, we often use steel and aluminum that is produced overseas. If your project must meet “Buy American” criteria, we are happy to build your fixtures from steel and/or aluminum with origin in the United States. If this is required, we ask that you designate this at the end of any of our part numbers with the code “**-USA**”. This will tell us that all metal to be used in these fixtures is to be produced in U.S. plants only. Please bear in mind that, due to factors beyond our control, there may be an additional charge as well as an additional lead time associated with this option.

If you have any questions regarding this or any other Birchwood Lighting matters, please feel free to contact your local representative or the factory.

Sincerely,

Darrin Weedon  
President
